## **Simplify your photo management with our Lynx Photo Manager software.**

The Lynx Pro and the Lynx Pro Plus software offers a way to remove the headaches of managing your project photo documentation, depending on your company needs. Our program manages, compresses (optional) and communicates your visual records quickly at a *huge cost savings* in man hours and hard drive space (using our compression feature) all in one, high speed, secure database located at your home office.

Both of our products work with all versions of SQL Server and have unlimited database storage capacity in addition to auto transfer service, ability to import users from AD/TEXT/XML and acquire image, pdf or video files.

Directly upload photos via the Internet into a single secure database where your images may be viewed, searched, saved or printed by anyone you allow. Create hyperlinks to link project images to schedules, documents, calendars, maps...any third party application that accepts hyperlinks. Link your project photos to your document management system i.e. Sharepoint, Primavera, Meridian, MS Project or any third party application. No more searching through folders upon subfolders to find the images you need. Eliminate having photos, renamed, resized, moved, deleted, altered or lost.

Use Lynx as a marketing tool. Create and send your prospects a hyperlink showing off your best work! Keep clients visually updated by allowing them to see "filtered" ongoing work in progress images on their projects. Give your field technicians a way to upload from on-site directly into the secure database back at headquarters - with all of their notes and annotations via the Internet. When a problem does come up, you can now see exactly what occurred, where and when, and by whom, saving you countless man hours and expensive claim and litigation costs.

"With this technology you can visually walk every project every day right from your pc, laptop, or any mobile device internet browser!"

### **Lynx Professional**

The Lynx Professional solution is a perfect turn-key product to manage your project photos and enables you to break down your organization into groups of users in order to separate who has access and what features are available to company projects.

**Base Price \$3000 Includes 2 Authorized Web User Licenses & One Year Annual Support  
\$1000 Annual Support after the first year**

*All users can search, view, print & save images, however only Authorized Web Users can upload, red line, annotate & edit photo information.*

### **Lynx Professional Plus**

The Lynx Professional Plus solution is designed for larger construction companies and government agencies who have a lot of users all communicating and managing photos AND you get all of the Lynx features unlocked. More back end features are included such as Active Directory interface (for managing thousands of users), ability to connect to multiple databases, project filters (an extra level for breaking down your projects), masking feature for fields within the program, require/confirm project name, force file method, view current users logged in, custom Web Acquire installation and acquire audio files.

**Base Price \$6000 Includes 5 Authorized Web User Licenses & One Year Annual Support  
\$1200 Annual Support after the first year**

*All users can search, view, print & save images, however only Authorized Web Users can upload, red line, annotate & edit photo information.*

Ongoing annual support keeps Authorized Web Users /Concurrent PC Users active & entitles you to toll-free tech support, software updates & future upgrades. Support fees for any additional Authorized Web User/Concurrent PC User Licenses purchased are waived until your annual company billing date. All billing for support occurs one time each year and is based on your main license & the total number of Authorized Web Users /Concurrent PC Users you want to keep active.

Payment plans are available, please call for details. ♦ We accept all major credit cards via telephone order or online store.
