## **Lynx is a high-speed secure photo management solution for all of your digital evidence documentation.**

Lynx Photo Manager is a *high-speed, searchable & secure database solution* for your digital evidence photos used by government and law enforcement agencies world wide.

We are dedicated to helping these agencies use an affordable secure photo management software program for organizing digital evidence and managing their cases more effectively.

Visit [www.lynxphotomanager.com/lawenforcement](http://www.lynxphotomanager.com/lawenforcement) to view an online demonstration of the program & see how Lynx can work for you

### **Lynx Photo Manager Key Features**

- Use our proven tamperproof visual record system, an invaluable tool for managing your digital evidence. Images are instantly authenticated and secured in one single SQL database. Photos are encrypted and only accessible to users with permissions.
- Keep your important visual evidence records from being altered, copied, mislabeled, deleted or lost. Have complete control & functionality over user access to control what features are available to each user or group.
- Securely upload images direct from squad cars into your database via the internet.
- Quickly find digital evidence within one case or across all cases instantly! Send hyperlinks to the District Attorney or Prosecuting Attorney for on-going cases.
- Annotate your images with redline layers, voice, text, notes and custom search fields while keeping your original photos always safe.
- Keep a tamper-proof audit trail showing the chain of custody of all your digital media from the moment it is acquired.
- Organize images by date, case number or detailed description. Utilize user defined custom search fields, to ensure you get all the necessary information on your evidence.
- Seamlessly integrate your images *-using a simple hyperlink-* into your RMS Record Management Systems, LIMS Laboratory Information Management System or any third party software program that accepts hyperlinks.
- Reduce time wasted searching, saving or archiving photos stored as individual picture files scattered across local, network removable drives.

Please contact our sales team with any questions at 877-955-7711 x1 or sales@lynxpm.com.

Sincerely,

Lynx Photo Manager

Lynxpm LLC

## Simplify your digital evidence management with Lynx Photo Manager

Our software offers a way to remove the headaches of managing your case photo documentation. Lynx Photo Manager manages, compresses and communicates your visual records quickly at a *huge cost savings* in man hours and hard drive space (using our free compression feature) all in one, high speed, secure database located at your home office.

Directly upload photos via the Internet into a single secure database where your images may be viewed, searched, saved or printed by anyone you allow.

Create hyperlinks to link case images to schedules, documents, calendars...any third party application that accepts hyperlinks. Link your case photos to your record management system i.e. RMS and LIMS. No more searching through folders upon subfolders to find the images you need. Eliminate having photos, renamed, resized, moved, deleted, altered or lost.

Create and send the District Attorney or Prosecuting Attorney a simple hyperlink updating them on latest breakthroughs!

Give your officers a simple effective way to upload from on-site directly into the secure database back at headquarters - with all of their notes and annotations via the Internet.

### Lynx Professional Plus

The Lynx Photo Manager Professional Plus solution is a perfect turn-key product to manage cases. It is designed for law enforcement agencies that need to break down their organization into groups of users in order to separate who has access and what features are available to users. Our program offers unlimited database storage space, auto transfer service, the ability to import users from AD/TXT/XML and can acquire other forms of digital media such as pdf and video.

Lynx is designed to handle agencies with hundreds if not thousands of users all communicating and managing very large quantities of photos. Lynx includes back end features such as Active Directory interface (for managing thousands of users), ability to connect to multiple databases, case filters (an extra level for breaking down your cases), masking feature for fields within the program, require/confirm case name, force file method, view current users logged in, acquire audio files and custom Web Acquire installation.

**Base Price \$6000**

**Includes 5 Authorized Web User Licenses & One Year Annual Support**

**\$1200 Annual Support after the first year**

*All users can search, view, print & save images, however only Authorized Web Users can upload, red line, annotate & edit photo information.*

Ongoing annual support keeps Authorized Web Users /Concurrent PC Users active & entitles you to toll-free tech support, software updates & future upgrades . Support fees for any additional Authorized Web User/Concurrent PC User Licenses purchased are waived until your annual company billing date. All billing for support occurs one time each year and is based on your main license & the total number of Authorized Web Users /Concurrent PC Users you want to keep active.
